

4 OUTSTANDING HOEBER BOOKS IN PSYCHOSOMATIC MEDICINE

DeJong on THE NEUROLOGIC EXAMINATION

New! This comprehensive text, by incorporating the fundamentals of neuroanatomy and neurophysiology, offers new help leading to more accurate neurologic diagnosis.

By RUSSELL N. DEJONG, M.D., *Chairman, Dep't of Neurology, Univ. of Michigan*, 1100 pp., 368 illus., \$15.00

Klein, Potter & Dyk's

ANXIETY IN PREGNANCY AND CHILDBIRTH

New! This latest volume in the *Psychosomatic Medicine Series* reports on a pioneer objective study of the psychosomatic factors influencing pregnancy and childbirth as seen in a representative series of primiparas.

By HENRIETTA R. KLEIN, M.D., *Assoc. in Psychiatry, Columbia Univ.*, HOWARD W. POTTER, M.D., *Prof. of Psychiatry, Long Island College of Medicine*, and RUTH B. DYK, M.S., *Research Dep't, N. Y. C. Youth Board*, 125 pp., \$2.75

Grace, Wolf & Wolff's

THE HUMAN COLON

In Press! New knowledge of colonic function arises from this study of four patients with exposed segments of colon. Vivid color plates help make clear the influence of such normal reactions as anger, fear, satisfaction, etc.

By WILLIAM J. GRACE, M.D., *Asst. Prof. of Medicine*, STEWART WOLF, M.D., *Assoc. Prof. of Medicine*, and HAROLD G. WOLFF, M.D., *Professor of Medicine (Neurology)*, all at *Cornell Univ.* With a foreword by ALAN GREGG, M.D., 256 pp., 112 illus., 31 in full color, \$7.50

Mettler's SELECTIVE PARTIAL ABLATION OF THE FRONTAL CORTEX

A Broad Study!—This complete report of an unusually broad-scale study sheds new light on the anatomy and physiology of the brain as well as on the effects of psychosurgery.

By the Columbia-Greystone Associates, FRED A. METTLER, M.D., *Editor*, 530 pp., 123 illus., \$10.00

SECURITY

through Education with Therapy

The ability to learn and to compete satisfactorily—the reassurance of understanding and acceptance and love are all component parts of establishing security in the growing child. The youngster with an emotional problem which is interfering with his native ability to learn needs *special* help if he is to achieve the security and balance so essential to his intellectual and emotional progress.

When you meet the problem of providing a school-age patient with specialized guidance, we invite you to let us evaluate the needs. When there is normal intelligence, but emotional disturbances which block the ability to learn, our experienced staff will carefully study the details and offer a considered report.
