**Schizophrenia: A Review of the Syndrome**

*Edited by Leopold Bellak, M.D.*

Never before have the manifold problems of schizophrenia been examined with such thoroughness. This integrated review of current literature, based on over 4,000 references, contains a depth and breadth of understanding hitherto unavailable to the research and clinical worker. Written by outstanding specialists, it inspects the disorder from every recorded etiological and conceptual point of view. *1010 pages, \$14.75*

**The Rorschach and the Epileptic Personality**

*By Jean Delay, Pierre Pichot, T. Lempérière, and J. Perse, Edited by Arthur L. Benton*

By combining the Rorschach technique with neurologic diagnostic procedures, four of the most outstanding French authors reveal—with definitive yet comprehensive awareness—the psychodynamic as well as somatopsychic functioning of epilepsy—discovering thus a royal road to the understanding of this disorder. *265 pages, \$6.00*

**Myokinetic Psychodiagnosis (M.K.P.)**

*By Emilio Mira Y Lopez,*

*Foreword by G. W. Allport, Ph.D.*

A peer of the Rorschach in importance, the M.K.P. occupies a unique position in the psycho-diagnostic field, for it approaches personality from the non-verbal and expressive characteristics. Standard equipment in Europe and Latin America, it has finally been made available to the American psychologist. Test forms in packages of 25, are available at \$5.00 a package. *186 pages, \$6.75*

**Psychology of Personality: Six Modern Approaches**

*Edited by J. L. McCary, Ph.D.*

Six leading research clinicians provide the answer to the question—what is personality? Dr. Henry A. Murray, Harvard University, calls this book: “. . . an intellectual feast . . . the frontier of contemporary thought.” *383 pages, \$6.75*
